subject index

BIOCHEMICAL SYSTEMATICS AND ECOLOGY

INDEX TO VOLUME 15 (1987)

Achillea, flavonoid glycosides from 5 species of the *nobilis* group 45
Acris crepitans, genetic variation and population subdivision of 377
Acrolepiopsis assectella, toxicity of a spirostane saponin to 113
Albumins, immunological cross-reactivity of in serum of turtles 621
Algae,
  halogenated monoterpenes of *Shottera nicaensis* 3
  carotenoid content of brown and red from marine N. Zealand 5
  variation in toxin composition of red tide dinoflagellates 171
  sterol composition of dinoflagellate symbionts of *Orbulina* 475
Alkaloids,
  indole, evolution of in *Aspidosperma* 187
  biochemical systematics of in genera of the Rutaceae 587
Alkanes,
  epicuticular, of some heath plants from Central Alaska 105
  in investigation of hybridization in *Asclepias* 395
  epicuticular, of some heath plants from Norway 663
Allelopathy, potential of sesquiterpene lactone in spotted knapweed 313
Allium porrum, identification of insect growth inhibitor in flowers of 113
Amino acids,
  free muscular, in osmotic regulation of *Astacus* 127
  free serum, in osmotic adaptation of *Astacus* 133
  sequences of, in lectins from the Leguminosae 341
  protein, of Leguminosae in relation to the development of *Callosobruchus* 427
  composition of in lectins from Papilionoideae and Vicieae 445
  free, circadian cycle of in hemolymph of crab 479
  free, in 22 species of Iridaceae 575
  composition of in ratite eggs of 3 kiwi species 625
  free, in 4 species of *Tricholoma* 639
Angiosperms, carotenoid content of leaves grown under various light intensities 523
Anthocyanins, correlations with taxonomy and pollination of *Penstemon* 355
Apes, great,
  transposition of CBI sequence of X chromosomes of 503
  repeated sequence restriction fragments of Y chromosomes of 511
Apiaceae, phylogenetic relationship with Asteraceae 321
Apteryx, composition of rabite eggs from 3 species of 625
Archangiopteris henryi, flavonoid profile of 529
Aristolochic acid, fate of ingested, in *Battus archidamas* 687
Artemisia,
  terpenes of *A. alba* in relation to environment 327
  chemotypes of *A. herba-alba* in Israel 411
Asclepias,
  chemical investigation of hybridization in 395
  seasonal variation in resource allocation of extractable compounds 417
Aspidosperma, evolution of indole alkaloids in 187
Astacus leptodactylus,
  isomotic regulation in abdominal muscles of 127
  osmotic adaptations in serum of 133
  circadian variations in carotenoid pigments of 607
Aster subulatus, flavonoids of 549
Asteraceae, phylogenetic relationship with Apiaceae 321
Autoploidy, ribosomal RNA genes in relation to in *Tolmiea menziesii* 75
Balsamorhiza deltoidea, foliar flavonoids from 541
Battus archidamas, fate of ingested aristolochic acid in 687
Bidens, photosensitivity of phylloplane fungi to polyacetylenes from 9
Birds,
  tissue distribution of esterases from starlings 145
  polymorphism of liver enzymes from starlings 385
  composition of ratite eggs from 3 kiwi species 625
  taxonomic status of *Nicator* 629

Bison bonasus, genetic variability of 285
Brassica campestris, localization of lipolytic and gluconeogenetic enzymes during germination of 551
Callosobruchus maculatus, seed protein amino acids in relation to development of 427
Cancer pagurus, circadian cycle of hemolymph constituents 479
Carotenoids,
content in 9 Phaeophyta and 5 Rhodophyta from N. Zealand 5
content in 24 lichen species from Greenland 297
keto, in autumn needles of *Metasequoia* 303
of 12 lichen species from Argentina 519
content in leaves grown under various light intensities 523
content in 15 gymnosperms grown under various light intensities 531
circadian variations in tissues of the crayfish 607
Centaurea maculosa, concentrations of cnicin in 313
Ceratina calcarata-dupla complex, biochemical systematics of 691
Chemosystematics,
of populations of lodgepole pine using monoterpene analysis 19
of flavonoid glycoside accumulation in *Achillea* leaves 45
of flavonoid glycosides in Egyptian Compositae 53
of indole alkaloid evolution in *Aspidosperma* 187
of volatile leaf oil composition in *Eucalyptus* 209
of flavonoid patterns in the specific complex *Dactylis glomerata* 225
of flavonoid patterns in the *Fagonia mollis*-complex 459
biochemical, of allozymes in S. African mole rats 489
biochemical, of *Tetradium*, *Euodia* and *Melicope* 587
biochemical, of isoenzymes from the genus *Lipara* 653
of leaf flavonoids in the Papaveraceae 673
Chemotaxonomy,
of phycobiliprotein pigments in lichens 15
of free flavone aglycones in Iberian *Thymus* species 61
of foliar flavonoids in selected taxa of N. American *Vitis* 79
of flavonoids from fossilized *Platanus* and its extant relatives 109
biochemical, of British stoneflies 117
biochemical, of S. American angel sharks 139
review of distribution of prenylated flavonols in plants 167
of toxin composition within the red tide dinoflagellate complex 171
comparison of subspecies of *Chrysothamnus nauseosus* and related species 201
of pteridine eye pigments in *Drosophila* 239, 247
of monoterpenes in relation to morphology of 4 *Pinus* species 307
of floral anthocyanins in the genus *Penstemon* 355
of the sesterterpene, variabilin, in N. Zealand sponges 373
of sesquiterpene lactones and essential oils in *Artemisia* 411
of seed lipids from the Lythraceae 433
of skeletal constituents in *Nautilus* 461
of sterols from dinoflagellate symbionts of marine invertebrates 475
of foliar flavonoid exudates from *Hemizonia* 535
of glucosinolate distribution in M. Eastern Cruciferae 559
of flavonoid profiles of *Lupinus texensis* and *L. subcarnosus* 571
of amino acids and peptides in the Iridaceae 575
of flavonoid patterns within the *Setaria italica* specific complex 581
of diterpenes in a marine sponge 595
of leaf resin flavonoids from *Isocoma* species 643
of whole plant flavonoids in *Muhlenbergia* 647
of flavonoids from *Helianthus* series *Microcephali* 671
Chrysothamnus,
analysis of sub- and related species of *C. nauseosus* 201
seasonal variation in resource allocation of extractable compounds 417
Cimicifuga, floral fragrances of 4 species of 441
Cnicin, concentrations of in spotted knapweed 313
Cruciferae,
co-occurrence of glucosinolates in and biosynthetic inference 365
glucosinolates in 51 species of M. Eastern 559
Cyanolipid, occurrence in seeds of *Valenzuelia trinervis* 71
Dactylis glomerata, proposed evolutionary scheme of the specific complex 225
Dictyoceratida, occurrence of variabilin in sponges of the order 373

Diterpenes,
patterns in soldier termites in relation to colony organization 253
environmentally induced changes of in a marine sponge 595
DNA, sequence homology of X/Y chromosomes in apes and man 503
Drosophila, pteridine eye pigments of Hawaiian 239,247
Echinococcus granulosus, comparative study of enzymes in hydatid cysts of 235
Electrophoresis,
survey of 16 enzyme loci in 9 British Nemouridae 117
of isozymes and muscle proteins from angel sharks 139
of esterase isozymes in tissues from *Sturnus vulgaris* 145
of blood proteins and enzymes from African rodents 149
isoelectric focusing of zeins from seeds of *Zea* and *Tripsacum* 231
comparison of three enzymes from cysts of *Echinococcus* 235
of hemolymph proteins during moulting of *Penaeus* 263
of two enzymes - coding loci in tissues of mullet 269
of 11 enzyme systems from muscles of *Solea lascaris* complex 273
of proteins and enzymes from European bison 285
of 16 enzyme loci from 14 populations of cricket frog 377
of esterase activity in liver tissue of *Sturnus vulgaris* 385
of proteins in hemolymph of crab 479
of phosphoglucose isomerase in muscles of freshwater crab 487
of enzymes and proteins from livers of mole rats 489
Southern blots of restriction patterns from X and Y chromosomes 503
Southern blots of Y chromosome human specific repeated sequences 511
of phosphoglucomutase from *Helianthus debilis* 545
of soluble feather proteins from *Nicator* 629
of 25 enzyme systems from the genus *Lipara* 653
isozyme analysis of 2 species of carpenter bees 691
isoenzyme analysis in populations of sole species 699
ELISA, in immunochemistry of lectins from *Lathyrus* 349
Environment,
terpene composition of *Artemisia alba* in relation to 327
response of essential oils of peppermint genotypes to 335
Enzymes,
polymorphism of 16 loci in British stoneflies 117
isozyme analysis in identification of *Squatina* species 139
tissue distribution of esterases in starlings 145
blood, electrophoretic variability in African rodents 149
electrophoretic study of 3 in cysts of *Echinococcus* 235
polymorphism of in tissues of mullet from Middle East 269
polymorphism of in muscles of French sole 273
electrophoretic polymorphism of in European bison 285
allozyme analysis from 14 populations of *Acris crepitans* 377
polymorphism of esterases in liver tissue of starlings 385
polymorphism of phosphoglucose isomerase in *Sesarma* 487
allozyme differentiation and systematics of mole rats 489
fungal, catalyzing cleavage of N-glycosidic bond of pyrimidine ribonucleosides . 515
phosphoglucosemutase, polymorphism for isoenzyme number in *Helianthus* 545
localization of lipolytic and gluconeogenetic in turnip seedlings 551
ligno-cellulosic, evidence for in a marine fungus 635
systematics of isoenzymes from the genus *Lipara* 653
hexokinase and malate dehydrogenase as genetic markers for carpenter bees 691
thermal behaviour of A_4 lactate dehydrogenase from crested newt 695
polymorphism of in species of *Solea* 699
Ericaceae, epicuticular wax alkanes in 10 species of 105
Essential oils,
composition of in *Artemisia* and environment 327
content and composition of in 10 peppermint genotypes 335
constitution of in chemotypes of *Artemisia herba-alba* 411
Eucalyptus, seasonal variation in volatile leaf oils of 2 species 209
Euodia, biochemical systematics of in the Rutaceae 587
Evolution,
of quassinoids and limonoids in the Rutales 85
of indole alkaloids in *Aspidosperma* 187

Evolution,
proposed, of the specific complex *Dactylis glomerata* 225
Fagonia mollis-complex, flavonoid patterns in 459
Fatty acids,
in investigation of hybridization of *Asclepias* 395
of seed lipids from the Lythraceae 433
changes during moulting of the female crab 611
composition of in ratite eggs of 3 Kiwi species 625
of 4 species of mushrooms 639
Fish,
biochemical evidence for a third S. American species of angel shark 139
enzyme polymorphism in mullet from Middle East 269
enzyme polymorphism in sole species from France 273
biosystematics and genetic relationships of 2 sole species 699
Flavonoids,
glycosides from leaves of the *Achillea nobilis* group 45
glycosides from 6 species of Compositae from Egypt 53
intrapopulational variation in *Lasthenia burkei* 57
excretion, chemotaxonomy of in Iberian *Thymus* species 61
foliar, chemotaxonomy of in N. American *Vitis* taxa 79
of fossil Miocene *Platanus* and its extant relatives 109
prenylated flavonols, distribution in flowering plants 167
modelling of flavone glycosylation clines in *Silene latifolia* 217
patterns in the specific complex *Dactylis glomerata* 225
patterns in the *Fagonia mollis*-complex 459
C-glycosylflavones of *Archangiopteris henryi* 529
foliar exudate, in the sectional taxonomy of *Hemizonia* 535
foliar, of *Balsamorhiza deltoidea* 541
foliar, of *Wyethia mollis* 541
free and glycosides from *Aster subulatus* 549
profiles of *Lupinus texensis* and *L. subcarnosus* 571
discriminative patterns within the *Setaria italica* specific complex 581
similarities in leaf resins from *Isocoma* species 643
whole plant, from populations and species of *Muhlenbergia* 647
glycosides from *Mercurialis annua* 667
ray flower and leaf from *Helianthus* series *Microcephali* 671
comparative study of in some members of the Papaveraceae 673
Fragrances, composition and incipient speciation in *Cimicifuga* species 441
Fungi,
photosensitivity of, to polyacetylenes from *Bidens* species 9
enzymes catalyzing cleavage of N-glycosidic bond of pyrimidine ribonucleosides .. 515
evidence for ligno-cellulosic enzymes in *Corollospora maritima* 635
composition of 4 species of *Tricholoma* 639
Furanocoumarins, content in populations of *Pituranthos* 453
Fusarium, enzymes catalyzing cleavage of N-glycosidic bond of pyrimidine ribonucleosides 515
Glucosinolates,
compound co-occurrence and biosynthetic inference 365
distribution and chemotaxonomic significance in the Cruciferae 559
γ-Glutamyl peptides, in 22 species of Iridaceae 575
Gorilla gorilla,
transposition of CBI sequence of X chromosome of 503
Y chromosome human specific repeated sequences of 511
Grindelia,
diterpene acids in 20 species of N. American 401
seasonal variation in resource allocation of extractable compounds 417
Gymnosperms, carotenoid content in leaves grown under various light intensities ... 523,531
Heath plants,
epicuticular wax alkanes of from Central Alaska 105
epicuticular wax alkanes of from Norway 663
Helianthus,
polymorphism of phosphoglucomutase in *H. debilis* 545
flavonoids from 3 species of *H.* series *Microcephali* 671
Hemizonia, foliar flavonoid exudates and sectional taxonomy of 535
Holocarpha virgata, isolation of 11,13-dihydrocostus acid from 661

Homo sapiens, comparison of Y chromosome restriction fragments with gorilla and chimpanzee 511
Hybridization, investigation of between *Asclepias speciosa* and *A. syriaca* 395
Hydrocarbons, analysis of from sub- and related species of *Chrysothamnus* 201
Immunology, of serum albumins from 20 types of turtle 621
Insects,
toxicity of aginosid to leek moth larvae 113
genetic variation and biochemical systematics of British stoneflies 117
pteridine eye pigments in *Drosophila* species 239, 247
diterpene patterns in soldiers of the Neo-Guinean termite 253
larval development of *Callosobruchus* and seed protein amino acids 427
fate of ingested aristolochic acid in *Battus archidamas* 687
biochemical systematics of bees in *Ceratina calcarata-dupla* complex 691
Iridaceae, amino acids and peptides in 22 species of 575
Isoalantolactone, persistence of in soils 361
Isocoma, flavonoid similarities among 5 species of 643
Lactate dehydrogenase, thermal behaviour of A_4 from crested newt 695
Lasthemia burkei, intrapopulational variation in flavonoids from 57
Lathyrus, immunochemistry of lectins and phylogenetic relationships 349
Lectins,
amino acid sequences of in the Leguminosae 341
immunochemistry of in *Lathyrus* 349
amino acid composition in the Papilionoideae and Vicieae 445
Leguminosae, lectins as phylogenetic markers of speciation in 341
Lichens,
phycobiliproteins in phycobionts of *Stereocaulon* species 15
accumulation of phenols in *Pseudevernia furfuracea* 289
carotenoid content in 24 species from Greenland 297
carotenoids of 12 species from Argentina 519
Liminoids, evolution of in the Rutales 85
Lipara, biochemical systematics of the genus 653
Liza dussumeiri, enzyme polymorphism in tissues from 269
Lupinus, flavonoid profiles of *L. texensis* and *L. subcarnosus* 571
Lythraceae, seed lipids of 20 genera of 433
Melicope, biochemical systematics of in the Rutaceae 587
Mentha piperata, essential oils in 10 genotypes of 335
Mercurialis annua, flavonoid glycosides from 667
Metasequoia glyptostroboides, autumn carotenoids in needles from 303
Modelling, stability of a two-locus 'coacting' cline in *Silene* 217
Mole rats, allozyme differentiation and systematics of S. African 489
Monoterpenes,
halogenated, from the red alga *Shottera nicaensis* 3
oleoresin, variation between populations of *Pinus contorta* 19
leaf, geographic variation in *Sequoia* 31
wood, composition in relation to morphology of *Pinus* species 307
resin, composition in provenances of *Pinus brutia* 389
Morphochemotypes, in natural populations of *Pituranthos* 453
Mosses, carotenoid content in leaves grown under various light intensities 523
Moulting,
variations of hemolymph proteins during, in *Penaeus* 263
changes of lipid metabolism during, in *Pachygrapsus* 611
Muhlenbergia, flavonoids from 152 populations and 15 species of 647
Nasutitermes princeps, diterpene patterns in soldiers of 253
Nautilus, skeletal chemistry and its taxonomic significance 461
Nemouridae, genetic variation and biochemical systematics of 9 British 117
Nicator, taxonomic status of from feather protein analysis 629
Oleoresin, monoterpene analysis of from *Pinus contorta* 19
Orbulina universa, sterols of cultured zooxanthellae from 475
Osmotic regulation,
muscular amino acids of *Astacus* in relation to 127
serum amino acids of *Astacus* in relation to 133
Pachygrapsus marmoratus, lipid metabolism of female during moulting 611
Pan troglodytes,
transposition of CBI sequence of X chromosome of 503
Y chromosome human specific repeated sequences of 511

Papaveraceae, comparative study of flavonoids in members of 673
Papilionoideae, tentative phylogenetic tree of the 445
Penaeus kerathurus, variations in hemolymph proteins of during moulting 263
Penicillium, enzymes catalyzing cleavage of N-glycosidic bond of pyrimidine ribonucleosides 515
Penstemon, floral anthocyanins in the genus 355
Phenolics,
accumulation of depsides in *Pseudevernia furfuracea* 289
glycosides in leaves of *Populus tremuloides* 677
glycosides, seasonal patterns in 3 *Populus* species 681
Phosphoglucose isomerase,
polymorphism of in cysts of *Echinococcus* 235
polymorphism of in freshwater crab 487
Phosphoglucose mutase,
polymorphism of in cysts of *Echinococcus* 235
polymorphism of in *Liza dussumeiri* 269
polymorphism of for isoenzyme number in *Helianthus debilis* 545
Photosensitivity, of phylloplane fungi to polyacetylenes from *Bidens* species 9
Phycobiliproteins, presence in 6 species of *Stereocaulon* 15
Pinus,
rangewide comparison of monoterpenes between populations of *P. contorta* 19
monoterpene differentiation in relation to morphology of 4 species of 307
cortex resin composition in provenances of *P. brutia* 389
Polyacetylenes, photosensitivity of phylloplane fungi to from *Bidens* species 9
Populus,
phenolic glycosides in leaves of *P. tremuloides* 677
seasonal patterns in phytochemistry of 3 species of 681
Posidonia oceanica, degradation of leaves of by marine fungi 635
Proteins,
muscle, isoelectric focusing of from angel sharks 139
blood, electrophoretic variability in African rodents 149
zeins, as indicators of *Zea-Tripsacum* introgression 231
hemolymph, variations during moulting of *Penaeus* 263
electrophoretic polymorphism of in European bison 285
lectins as phylogenetic markers of speciation in Leguminosae 341
immunochemistry of lectins from *Lathyrus* 349
lectins of the Papilionoideae and Vicieae 445
circadian cycle of in hemolymph of crab 479
immunological cross-reactivity of serum albumins from turtles 621
soluble feather keratins from *Nicator* 629
Protogonyaulax tamarensis/catenella complex, variation in toxin composition of 171
Prunasin, occurrence of in *Salix interior* 69
Pseudevernia furfuracea, accumulation of phenolics in 289
Pteridines, analysis of in eye pigments of *Drosophila* 239,247
Pteridophytes, carotenoid content in leaves grown under various light intensities 523
Pyrimidine ribonucleosides, fungal enzymes catalyzing cleavage of N-glycosidic bond of 515
Quassinoids, evolution of in the Rutales 85
Resin,
monoterpene composition of cortex from *Pinus brutia* 389
grindelane diterpene acids in 20 species of *Grindelia* 401
Review, of prenylated flavonol distribution in flowering plants 167
Rhodoxanthin, content in gymnosperm leaves grown under various light conditions 531
Rhopaloeides odorabile, environmentally induced variation in diterpene composition of .. 595
RNA, ribosomal gene variation in autoploids of *Tolmiea menziesii* 75
Rodents, African, variability of blood proteins among 2 populations of 2 genera of ... 149
Rutaceae, biochemical systematics of *Tetradium*, *Euodia* and *Melicope* 587
Rutales, evolution of quassinoids and liminoids in 85
Salix interior, occurrence of prunasin in 69
Saponins, toxicity of aginosid to larvae of leek moth 113
Sequoia sempervirens, geographic variation in leaf monoterpenes of 31
Sesarma boulengeri, polymorphism of phosphoglucose isomerase in 487
Sesquiterpenes,
lactone, concentrations of cnicin in *Centaurea maculosa* 313

Sesquiterpenes,
lactones, in phylogeny of Asteraceae and Apiaceae 321
lactone, persistence of isoalantolactone in soils 361
lactones, constitution of in chemotypes of *Artemisia herba-alba* 411
isolation of 11,13-dihydrocostus acid from *Holocarpha virgata* 661
Setaria italica specific complex, discriminative flavonoid patterns within 581
Shottera nicaensis, halogenated monoterpenes from 3
Silene latifolia, model study of a two-locus 'coacting' cline 217
Solea,
enzyme polymorphism in muscles of *S. lascaris* complex 273
biosystematics and genetic relationships of *S. aegyptiaca* and *S. senegalensis* 699
Sponges,
occurrence of variabilin in the order Dictyoceratida 373
diterpene composition of *Rhopaloeides odorabile* 595
Squatina, biochemical evidence for a third S. American species 139
Stereocaulon, presence of phycobiliproteins in 6 species of 15
Sterols, as probes for zooxanthellae in marine invertebrates 475
Sturnus vulgaris,
tissue distribution of esterases from 145
enzyme polymorphism in liver tissues from 385
Terpenes,
in essential oil of *Artemisia* in relation to environment 327
in essential oils of 10 peppermint genotypes 335
Tetradium, biochemical systematics of in the Rutaceae 587
Tetrazolium oxidase,
polymorphism of in cysts of *Echinococcus* 235
polymorphism of in *Liza dussumeiri* 269
Thymus, chemotaxonomy of flavones in some Iberian species of 61
Tolmiea menziesii, ribosomal RNA gene variation in autoploids of 75
Toxins, composition of within the red tide dinoflagellate complex 171
Trichloma, constituents of 4 species of 639
Tripsacum, zeins as indicators of introgression with *Zea* 231
Triterpenoids, in investigation of hybridization in *Asclepias* 395
Triturus cristatus, thermal behaviour of an enzyme from 695
Turtles, immunological cross-reactivity of serum albumins of 621
Valenzuelia trinervis, components of seeds from 71
Vicieae, tentative phylogenetic tree of the 445
Vitis, chemotaxonomy of foliar flavonoids in selected taxa of 79
Volatile oils, leaf, seasonal variation in 2 *Eucalyptus* species 209
Wyethia mollis, foliar flavonoids from 541
Zea, zeins as indicators of introgression with *Tripsacum* 231
Zeins, as indicators of *Zea-Tripsacum* introgression 231

Compiled by Dr. Peter J. Holloway, Long Ashton Research Station,
University of Bristol, Bristol, BS18 9AF, UK.
